Summary

Full Stack Developer skilled in React.js, Node.js, and Express.js, with hands-on experience delivering AI-integrated web applications. Adept at REST API design, database integration, and cloud deployment; seeking a software engineering role to build scalable, impactful products.

Education

- Vellore Institute of Technology (VIT), Vellore** — B.Tech (CSE), CGPA: 8.46 2022–2026
- Pace Junior Science College, Mumbai** — Intermediate (PCM), 82% 2020–2022
- RBK School, Mumbai** — High School, 95.4% 2019–2020

Experience

Expond Technivo, Mumbai — Web Development Intern Jun 2025 – Jul 2025

- Built and integrated full-stack web modules using React.js and Express.js, contributing to both frontend and basic backend functionality
- Developed reusable UI components with Tailwind CSS, improving consistency across pages
- Worked with REST APIs to connect frontend with backend services and ensure smooth data flow
- Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, REST APIs, Git

Anvitech Solutions LLP, Mumbai — Frontend Development Intern

Jun 2024 – Jul 2024

- Designed and developed 8–10 responsive web pages using HTML, CSS, JavaScript, and Bootstrap
- Built and styled UI components to ensure a clean and consistent look across all pages
- Fixed UI bugs and ensured consistent appearance across different browsers and screen sizes
- Tech Stack:** HTML, CSS, JavaScript, Bootstrap, Git

Projects

Resume Optimizer AI ([Link](#))

- Built a full-stack web app where users upload a resume and a job description to get a match score, missing keywords, and improvement suggestions
- Used Google Gemini API to analyze and compare resume content against job requirements
- Designed a clean, responsive UI and modular backend services for reliable parsing and scoring
- Tech Stack:** React.js, Node.js, Express.js, Tailwind CSS, Google Gemini API, Git

NextNews – AI News Platform ([Link](#))

- Built an automated AI news platform that collects news from multiple internet sources, processes the raw content, and presents it in a clean, structured format
- Integrated multilingual translation and text-to-speech functionality so users can read news in their preferred language or listen to it as audio
- Designed a full-stack architecture with a Python backend for AI processing and a React/Next.js frontend for organized news display
- Tech Stack:** React.js, Next.js, Python, NLP, REST APIs

AI Powered Lie Detector – Multimodal Deception Analyzer ([Link](#))

- Developed a system that analyzes both facial expressions and speech from a video to detect signs of deception
- Used Google Gemini API to combine audio and visual signals and generate a truth probability score
- Handled multiple media formats and structured the output as clean JSON for easy interpretation
- Tech Stack:** Python, OpenCV, MoviePy, Gemini API, JSON

Travel Planner App ([Link](#))

- Built an AI-powered travel assistant that suggests tourist destinations and shows real-time weather for any location
- Integrated Gemini 1.5 Flash for smart recommendations and OpenWeatherMap API for live weather data
- Developed a fast, responsive full-stack interface with optimized API handling
- Tech Stack:** React (Vite), Node.js, Express.js, Tailwind CSS, OpenWeatherMap API, Gemini 1.5 Flash, Git

Skills

Web & Frameworks: HTML, CSS, JavaScript, Bootstrap, React.js, Tailwind CSS, Node.js, Express.js

Languages: Java, C++, C, Python, SQL **Databases:** MySQL **Tools:** Git, GitHub

Generative AI: GitHub Copilot, Prompt Engineering, AI-Assisted Development **Cloud & CRM:** AWS Cloud, Salesforce

Cybersecurity: Network Security, Risk Management, SIEM Tools, Intrusion Detection Systems (IDS), Linux, SQL

Data & Analytics: Power BI, Excel, PowerPoint, NLP **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile

Certifications

Google Cybersecurity Professional Certificate — Google (Coursera) ([Link](#)) — Comprehensive program covering network security, risk management, SIEM tools, IDS, Linux, SQL, and incident response.

Generative AI for Software Developers — Microsoft (Coursera) ([Link](#)) — Practical experience in generative AI concepts and AI-assisted software development using GitHub Copilot.

AWS Certified Cloud Practitioner CLF-C02 (Training Completion) ([Link](#)) — Comprehensive training on AWS fundamentals, core services, security best practices, pricing models, and cloud architecture principles.

SAP S/4HANA: From ABAP to Cloud-Ready Applications — Board Infinity (Coursera) ([Link](#)) — 3-course specialization covering ABAP programming, CDS view modeling, OData service creation, and full-stack development using SAP Fiori and the RAP model.
